Allowable Subject Matter

1. Claims 1-8 are allowed.

Independent claim 1 recites "...means for acquiring image data of full resolution for interlaced scanning in a vertical direction and thinning interlaced scanned image data to perform image reduction processing during decoding with field information maintained..." which is a feature that is not anticipated nor obvious over the art of record. Independent claim 2 recites "...means for performing reduction processing in a pixel area for resolution of interlaced scanning in a vertical direction wherein the reduction in vertical resolution is performed using even or odd lines in a top field and the other line in a bottom field..." which is a feature that is not anticipated nor obvious over the art of record. Independent claim 5 recites "...means for acquiring image data of full resolution for interlaced scanning in a vertical direction and thinning interlaced scanned image data, wherein the image data is decoded such that the image has lowered resolution at the time of display..." which is a feature that is not anticipated nor obvious over the art of record. Independent claim 6 recites "...means for acquiring image data of full resolution for interlaced scanning in a vertical direction and thinning interlaced scanned image data, wherein the image data is decoded such that the image has lowered resolution at the time of display..." which is a feature that is not anticipated nor obvious over the art of record.

Dependent claims 3-4 and 7-8 are allowed for the reasons concerning the independent claims.
